Assignment 5: SVD based image compression

Debasattam Pal • Mar 20, 2021

100/100   Due Mar 24, 2021

Take a photograph of yours and run the SVD based compression on it. You may use any programming language of your choice. Write a report that must include the following:
1. A full page where the result of various choices of the singular values is shown in tabular form (not more than four images in a row, and not more than 5 rows).
2. A pseudocode of the algorithm you followed.
3. Your code.
Also, please note that the TAs will announce a time when you may have to demonstrate how you run your algorithm.
